Not really sure what I should write about this game, other than that it's a very calm and relaxing game for anyone interested in the concept of producing and selling your own wine and I simply wanted to recommend it and give it a good score.. I very much enjoy old-school space shooters because they remind me of my childhood. I've re-played many of them in emulators as adult, often resulting in disappointment because they were a lot more detailed and complex in my memory.

Galencia is like one of those old games that still looks and plays perfectly today. This game was created by talented people and is worth your time.. twitch || steam || youtube || soundcloud : CSuperSioux

I know nothing of the apparent history concerning Crazy Otto but this game is "Pac-Man" and it includes a multiplayer mode where your friends can play as the "ghosts" (Crazy Otto's family and dinosaurs). I haven't played the multiplayer mode because, as usual, I lack friends that play/want to play these types of games. The game itself has the potential to be buggy, especially so in terms of the display -- transitioning between full-screen and windowed is not something that this game likes to do. Also, the controls, for whatever reason, manage to sometimes feel "inconsistent". All of that aside, assuming that you can get the game to run and you buy it for the right price (I bought it during a sale), this game is genuinely fun, even in single-player mode, partially due to the inclusion of leaderboards.. The intro is the best part of this game. The gameplay itself is fairly repetitive, and when I had reached the point of repeating levels or scenes, many of the sequences cannot be skipped even when I had seen them a number of times. I really like the concept which is why I bought it despite the poor reviews. I do not really care for the execution and was quickly bored with the title.

Additionally the Linux port is not very good. No resolution/fullscreen configuration without finding the config file and editing it, unlike the Windows launcher. It also does not handle widescreen aspect ratios unlike the Windows version.. Great classic game. Forget what the critics say about this game. It's pretty fun. It's good. 8/10. Nice.. Enemies die too quickly to make any skills other than the standard attack useless and the only reason you can't just stand and spam it is the annoyingly long spawn invincibility on enemies.

A futur nice game where you need to build castles. At the moment, it's just a "sand castle" game. But, I hope there will be soon a story mode or a survival mod where you need some supplies and where you can build your own "mini army". The castle building mod (a little bit saddly, the only feature avaiable now) is very well done except that the towers look often very "flat". I hope that there will be soon an update with the engineer mod and a flat map. Thanks to the devellopers for that future great game.. Not good, beat it in under an hour. poor microphone used for speech. Tedious joke pacing, potty humour.. First of all, I want to say this game is very cute looking and the style is very nice. The gameplay is very simple, consisting only of a left click which moves you left if tapped in quick burst, or the right button, which has the same function to the right. Holding either button down at all will make your player loop and change angle. This is a game about avoiding everything, and is pretty decently done, but feels more like something I would play on my phone tapping the sides of the screen. In fact, there are quite a number of free games similar to this in the android store (and probly more on the apple store)(If this game is available on mobile already let me know, I havn't researched this it is more of a first impression).

The only real complaint I had is that the music was very repetative and started to grate on my nerves fairly quickly. Overall, if you are looking for a cute time waster, this can do it, but chances are if you are on a PC you have better options.

I am kind of neutral on this game, just not really my thing, but at least it is colorful and has an adorable protagonist.. The bundle is worth the money for sure, and if you're into Hidden Object games i doubt you'll be disappointed with the games. The difficulty of the games vary but none are too difficult to get through.

Definitely worth your time.. very good loco add on ,lots of details,even the radio in the cab works .

10 out of 10 for this model loco.. This chapter is the best so far of Episode Two. It does a great job of bridging the gap between the first several episodes, and the subsequent second half. The setup is wonderful.. 51 minutes of my life I'll never get back, could've done so much during that time instead. I found all the characters really boring, including the main character is extremely shallow and lazy, not someone I wish to play as the protagonist. She is also rude and very selfish. I don't understand why she is so strange looking compared to some of the other females in the game which are pretty and feminine. And also the males look like 12 year old boys, act also like little boys and not men and don't feel comfortable trying to romance any of them due to this really young look and personality. Felt like this game was made for little kids and not young adults, also the mini games didn't get you anywhere, money made didn't provide anything either to do so felt like I was grinding for nothing and couldn't really get anywhere in the game.. hfgkjhvidiuvbduvblcfnbvlibvclib. Hey, so as a Youtuber, I must say--This is quite possibly one of the best horror games I've seen! If you can get over the fact that the game has fixed perspectives, you'll probably have quite a lovely time playing it.

Pros:Genuinely terrifying atmosphere, decent story, and very spooky events. Decent progression if you know how to manage your resources

Cons:I have NO idea what happens if I game over. Do I have to start all over again? Hopefully I won't need to find out, but a save point would be a nice reassurance.

Fixed perspective can be mildly irritating with navigation.

The actual random encounters are only really good for a flinch. not a real scare. Probably could use a variety of sounds for the jumpscare so we don't get the same one over and over.

Mind, I haven't played past the first hour or so. But still, I totally recommend it!
